DHRUV BISHT

Full Stack Developer

Hyderabad, India | dhruvbisht101@gmail.com

Portfolio: dhruvb-cloud.github.io/idcard | LinkedIn: linkedin.com/in/dhruvbisht | GitHub: github.com/DhruvB-cloud

PROFESSIONAL SUMMARY

Full Stack Developer with **3+ years of product management experience** at a tech startup. I have designed, built and deployed **three apps end to end** in Python, Java and JavaScript, two of them with cloud backends (Flask on Google Cloud Run, Cloudflare Workers). Comfortable across REST APIs, databases, Android front ends, CI pipelines and automated testing, with a product mindset that starts from the user and the requirement.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, HTML/CSS
Backend & Cloud: Flask, REST APIs, Docker, Google Cloud Run, Cloudflare Workers (D1, KV), SQLite
Mobile & Tools: Android (Java, Room), Kivy, Git & GitHub, GitHub Actions, Postman, Linux
Practices: Object-Oriented Programming, Data Structures & Algorithms, Automated Testing, API Design, Agile/Scrum

PROJECTS

FridgeChef | *Python, Kivy, Flask, Docker, Google Cloud Run* github.com/DhruvB-cloud/FridgeChef

- Android kitchen app in **Python + Kivy**: fridge inventory with expiry dates, recipe matching against what the user owns, cooking calendar and streaks.
- Built a **Flask REST API**, containerised with **Docker** and deployed on **Google Cloud Run**; the app falls back to an offline copy when the server is unreachable.
- Set up a **GitHub Actions** pipeline that builds the APK and publishes releases; wrote **43 automated tests** for the recipe engine, database upgrades, streaks and API.

AppHub | *JavaScript, Cloudflare Workers, D1 (SQL), KV, GitHub API* app-hub.dhruvdoit.workers.dev

- Serverless app-distribution hub on **Cloudflare Workers** that reads GitHub repos via the **GitHub API**; tagging a repo publishes its app automatically.
- Secure downloads from **private repos** (token kept server-side, short-lived links), **D1 SQL database** for feedback, **KV** for screenshot uploads and a password-protected admin page.

BookBuds | *Java, Android, Room (SQLite)* *Source code on request*

- Native **Android audiobook player in Java** with a **Room (SQLite) database** and versioned schema migrations.
- Background playback service with notification, lock-screen and **Bluetooth earbud** controls; bookmarks, per-book speed, home-screen widget and listening history with CSV export.

PROFESSIONAL EXPERIENCE

Associate Product Manager | *Mooments, Hyderabad* **08/2023 – Present**

- **Performance:** identified the slowest step in the dashboard's data pipeline and drove a **Redis caching** rollout with the engineering team, from requirements to production release.
- **API specifications:** rewrote the platform's API documentation with a focus on security and reliable communication between services.
- **Client delivery:** coordinated brand clients and cross-functional engineering teams through a full website infrastructure revamp, from scoping to launch.

Trainee Intern | *Mooments, Hyderabad* **05/2023 – 08/2023**

- **Test automation:** built automated API test workflows in **Postman**, replacing repetitive manual testing.

EDUCATION

B.Tech, Computer Science & Engineering (Specialisation in IoT) **2019 – 2023**
Vellore Institute of Technology, Vellore

- **Academic projects:** IoT poison-gas early-warning system (Arduino, NodeMCU); malicious website detection script (Node.js, HTML, CSS).

CERTIFICATIONS & COMMUNITY

- **HackerRank Gold** in Java and SQL (ID: 36F65886F3F9)
- **Community:** hosted art workshops (60+ attendees), a book donation drive (250+ books) and monthly book discussions (100+ readers) in Hyderabad.
- Core Developer, IEEE-IAS Student Chapter (VIT) • Core Committee Member, VIT Linux User's Group
